FOREIGN RN APPLICANTS

Applicants that have been advised by the Board of Registered Nursing to take specific courses for licensure must:

- Submit College of the Canyons application and obtain a student identification number.
- Submit a Nursing Program Application and BRN letter to the Allied Health and Public Safety Office *(accepted Aug. 1 – Aug. 31 only)*

*Incomplete applications will not be eligible.*

- Qualified applicants will be required to take a state approved nursing assessment test. Students must rank at the required level to be eligible for admission into the program. Currently, this is a 62% composite score based on the California Community College Chancellor’s Office recommendation. Valid photo ID must be presented at time of test.

- Applicants not meeting the required 62% composite score are offered a remediation plan. After successful completion, students are eligible to reapply. If the remediation plan is not complete by the deadline, the student is no longer eligible to apply to the program.

- Accepted applicants will be notified as to which portions of the curriculum must be taken to complete the BRN requirements.

- Selected applicants must attend a mandatory orientation and complete Transitions into Nursing, Nursing 109. Upon completing Nursing 109, the student will be placed on a waiting list until an opening in the appropriate course becomes available.

- Qualified applicants not selected must reapply in order to be considered. The Allied Health and Public Safety Division Office does not retain applications.

*NOTE: Students advised by the BRN of a deficiency in Medical-Surgical Nursing, must apply to the core RN Program.* To apply, follow application procedures at [www.canyons.edu/departments/nursng](http://www.canyons.edu/departments/nursng).
