Associate Degree Information

Associate Degrees for Transfer

Recent California Legislation guarantees admission to a California State University (CSU) campus for any community college student who completes an “associate degree for transfer”, a newly established variation of the associate degrees traditionally offered at a California community college. The Associate in Science for Transfer (AS-T) in Math, Physics, Computer Science (pending), and Geology (pending), or the Associate in Arts for Transfer (AA-T) in Geography is intended for students who plan to complete a bachelor’s degree in a similar major at a CSU campus. Students must earn a C or better in all courses required for the major or area of emphasis. Please see the following website for additional information regarding planning which courses to take within your chosen major and when, http://www.canyons.edu/Offices/MathScienceDiv/Pages/Classes.aspx, as well as see a counselor for more information.
