Students Seeing their Grades

**Question:** How do students see their grades? I have a menu link on the sidebar menu that says My Grades, but do I need to activate it? Or when I post assignment columns and enter grades, will they automatically be able to click on My Grades and see them?

**Answer:** There's nothing special you need to do to allow students to see their grades— it will happen automatically as long as you allow that item to be viewable to students.

To check and make sure an item is viewable to students, from the Full Grade Center:
- Click on the little down arrow next to your assignment name in the column heading.
- Click Edit Column Information.
- Scroll down to make sure you have "Show this Column to Students" set as yes.

Students will see the assignment, and then will be able to view their score as soon as you input it in the Grade Center.
