Course Description:

This section of POLSC 150 is 100% online. This course provides an introduction to major concepts, processes, institutions and issues in the American and California political systems. Initially, the course will consider the debate over political values. We will look at the struggle over the U.S. constitution and the major political ideologies that have evolved in the last two hundred years. Next we will consider the role public opinion; the media, political parties, and interest groups play in the political process and the ways in which they influence the branches of government. We study the dominant institutions – the Congress, the Presidency, and the Judiciary and their interactions. Throughout we will try to identify the underlying value choices at stake by looking at important policy questions.
