Accessing the Academic Program Review

- Log onto www.canyons.edu/apr
- From here you will be prompted for your COC username and password, which is the same used to access your college email through Outlook.
- On the main screen of the program review page, you will select the program/department for which you are completing a program review. If you have multiple program reviews to complete, the drop down menu will include those departments. If you only have one review to complete, only one will appear in the drop-down menu.
- If a program listed under you does not appear in the drop down or you wish to complete a program review for a new department or program, please contact Daylene Meuschke at x5329 or email at daylene.meuschke@canyons.edu for assistance.
- After selecting your program, click “next” as circled in the screenshot below.
After clicking on the “edit” link in the previous screen, you will have the ability to update or revise the objective and related strategic goal, if needed, the status of the goal and provide additional comments. Additional comments are optional.

The screenshot below shows the College’s Strategic Goals. An objective may align with more than one goal but you need to choose the goal with which is most closely aligns.
