

CHAPTER 11

Across

- 8 Lipid molecule with a short carbohydrate chain attached
- 9 Membrane that surrounds a living cell
- 10 Thin bimolecular sheet of mainly phospholipids

Down

- 1 Soapy compound
- 2 Lipid molecule in a four ringed structure
- 3 Protein associated with a lipid bilayer
- 4 Both hydrophobic and hydrophilic
- 5 Coat of polysaccharides
- 6 Protein with covalently linked oligosaccharide
- 7 Type of lipid used to make biological membranes
