

## CHAPTER 4 CROSSWORD

### Across

- 1 GTP + ATP
- 3 lipid used to store metabolic energy
- 6 ATP ? \_\_\_\_\_+P
- 8 polysaccharide composed exclusively of glucose units
- 9 central metabolic pathway in all aerobic organisms
- 11 major electron carrier. Reduced version of adenine dinucleotide

### Down

- 1 six carbon sugar stored as glycogen in animals cells
- 2 a three carbon molecule that is formed by glycolysis
- 3 anaerobic breakdown of organic molecules
- 4 sugar splitting. Metabolic pathway in cortisol
- 5 reduced form of nicotinamide adenine dinucleotide
- 6 formed after first CO<sub>2</sub> leaves sugars
- 7 composed exclusively of glucose units, abundant in liver and muscle
- 10 adenine, ribose & three phosphates
