

CHAPTER 6 CROSSWORD

Across

- 4 polymer formed from ribonucleotide subunits
- 9 A-T, A-U, G-C, etc.
- 10 AKA pattern
- 11 is made in discontinuous segments
- 13 total genetic information carried by a cell or an organism

Down

- 1 catalyzes polymerization of DNA subunits
- 2 two strands in a DNA double helix
- 3 DNA polymerase corrects its own errors by _____
- 5 involves continuous synthesis in 5' to 3' direction
- 6 the typical conformation of a DNA molecule
- 7 Double stranded polynucleotide
- 8 a heritable alteration in the nucleotide sequence
- 12 region of DNA that controls a discrete hereditary characteristic
