

CHAPTER 9

Across

- 5 Specialized cell that gives rise to gametes
- 7 Motile male gametes
- 9 Reproduces by transcribing its RNA into DNA
- 10 Cells take up DNA molecules from their surroundings

Down

- 1 Nonmotile female gamete
- 2 Gene that makes cells cancerous
- 3 Virus-mediated transfer of host DNA
- 4 Small circular DNA molecule
- 6 Reductional type of cell division
- 8 Infectious particle
