

High-Performance Liquid Chromatography (HPLC)

BIOTECHNOLOGY

HPLC is used by scientists to separate one substance from another. It is so sensitive that it can detect drug residue in hair 5 years after ingestion!

College of the Canyons has lab facilities with millions of dollars in high tech equipment, a new state-of-the-art cleanroom and a hands-on approach to science.

Not to mention, numerous programs on campus designed to help you get a....JOB!

Did you know that rigorous science training will make you more competitive for ANY type of job? Employers know that students who can tackle hard science will do well with almost ANY challenges presented them.

- Science coursework seriously boosts a student's career options even in non-science careers!
- 25 of the top 30 fastest growing jobs are science related!
- Employers want people who have skills in analysis, critical thinking and problem solving and they cite science as preferred subjects which help increase these essential skills.
