Data Sources and Calculations

Industry Data

In order to capture a complete picture of industry employment, EMSI basically combines covered employment data from Quarterly Census of Employment and Wages (QCEW) produced by the Department of Labor with total employment data in Regional Economic Information System (REIS) published by the Bureau of Economic Analysis (BEA), augmented with County Business Patterns (CBP) and Nonemployer Statistics (NES) published by the U.S. Census Bureau. Projections are based on the latest available EMSI industry data, 15-year past local trends in each industry, growth rates in statewide and (where available) sub-state area industry projections published by individual state agencies, and (in part) growth rates in national projections from the Bureau of Labor Statistics.

Occupation Data

Organizing regional employment information by occupation provides a workforce-oriented view of the regional economy. EMSI's occupation data are based on EMSI's industry data and regional staffing patterns taken from the Occupational Employment Statistics program (U.S. Bureau of Labor Statistics). Wage information is partially derived from the American Community Survey. The occupation-to-program (SOC-to-CIP) crosswalk is based on one from the U.S. Department of Education, with customizations by EMSI.

State Data Sources

This report uses state data from the following agencies: California Labor Market Information Department.

Occupational Makeup

SOC Code	Description	2009 Jobs	2015 Jobs	Change	% Change	% of Industry	Current Hourly Earnings	Education Level
29-1111	Registered nurses	79,275	92,266	12,991	16%	6%	\$36.95	Associate's degree
43-6013	Medical secretaries	27,944	33,030	5,086	18%	2%	\$14.50	Postsecondary vocational award
31-9092	Medical assistants	33,345	41,103	7,758	23%	3%	\$13.94	Moderate-term on-the-job training
43-9061	Office clerks, general	39,383	44,254	4,871	12%	3%	\$12.77	Short-term on-the-job training
