

**Construction Management
Certificate of Achievement
Associate degree major
2008-2009**

Recommended Sequence of courses

The recommended course sequence is designed to provide students with the most efficient path to completion of the Construction Management program. All skills obtained during the first semester are utilized in the following semesters.

Semester I	Fall	Units
CONST 101	Introduction to Construction and Construction Engineering	2.0
CONST 103	Blue Print Reading for Construction	3.0
CONST 106	Construction Law Survey	3.0
Semester II	Spring	
CONST 102	Construction Management Principles	3.0
CONST 104	Construction Process-Planning and Scheduling	3.0
CONST 105	Construction Estimating Principles	3.0
Semester III	Fall	
SURV 101	Introduction to Land Surveying	4.0
ARCHT 140	Materials and Methods of Construction	3.0
Semester IV	Spring	
CONST 108	Introduction to Construction Inspection and Codes	2.0
BUS 101	Bookkeeping and Accounting	5.0

It may be possible to complete some of the required courses during a summer or winter intersession. Students whose educational objective is to earn an associate degree in Construction Management would need to complete the applicable general education requirements in addition to the courses for the major. It is highly recommended that students make an appointment with a counselor to develop an educational plan.
