

Technical Theatre A.A. Degree

Catalog Description

The Associate of Arts in Technical Theatre is designed to provide basic academic and practical training in technical theatre at the entry level for resident and touring theatres, theme parks, television and motion picture students or for students to transfer to a four-year school. Students may work on theatrical carpentry, lighting, costume construction etc.

Degree Learning Outcomes:

1. Demonstrate professional behavior as part of team implementing technical theater elements for a production.
2. Demonstrate safe construction and installation techniques for technical theatre disciplines such as scenery, lighting, or costumes.
3. Analyze a script, paying particular attention to technical elements.

Program Requirements

To earn an Associates Degree in Technical Theatre, students will need to complete 18 specified units of Theatre coursework and Cooperative Work Experience, plus General Education Degree Requirements.
