COC Economics Department welcomes you

I would be your instructor: Guillermo Cruz

M.A. Economics, McGill University, Canada.

Guillermo.cruz@canyons.edu

Tel.: (661) 362-5922

Pico Canyon Hall - Office 224

You will be studying Macroeconomics: (starts on 10/16/17 and ends on 12/09/17). This class is a 100% ONLINE CLASS.

You will be assigned MANDATORY readings from our REQUIRED class textbook: "Macroeconomics" or "Economics" by "Roger Arnold" and videos to watch every week on Thinkwell Website. There will be mandatory "Thinkwell Website Exercises" and then we will use COC CANVAS Website for tests and other assignments. Tests are based on the mandatory textbook readings.

If you sign for this class then you will receive an email a week before the starting date with additional relevant information to help you getting ready, including the syllabus.

For your success in this class:

- You will need to get familiar with these online components:

  1. "Thinkwell" platform: www.thinkwell.com
     You will need to purchase an access code from "Thinkwell" company to follow the videos and exercises. The bookstore sales this access code.
2. The URL for you to get familiar with Thinkwell Website Platform is: www.thinkwell.com/help/studentGuide/ and the email address for technical support is: techsupport@thinkwell.com

3. We will use COC CANVAS Platform for Exams and Discussion Board Questions

Useful LINK

- This link provides useful log on information for students. Distance Learning Home Page: http://www.canyons.edu/Offices/DistanceLearning/Pages/default.aspx

Please find below a preliminary overview of this class:

MACROECONOMICS ONLINE (ECON 201) - Winter 2017

DESCRIPTION ECON 201 introduces the concepts and tools of macroeconomic analysis, especially as they apply to US economy. Emphasis is placed on the broad overall performance of our economic system with concentration in areas such as national income determination, employment, and inflation. ECON 201 develops a logical analysis of short-term-business fluctuations in the economy and the long-term goal of "Full Employment" and then introduces governmental fiscal and monetary policies as possible solutions to them.

OBJECTIVES To prepare students for "The ordinary Business of Life" as well as for upper division courses in business and economics by applying economics concepts, analyzing economics problems, evaluating economic policies, and suggesting possible solutions.

S. L. O's Students will analyze and evaluate the problem of scarcity throughout markets by applying and appraising the Classical/Neoclassical and Keynesian solutions to business fluctuations, in terms of growth, inflation and unemployment.

Major Topics
- Introduction to Economics
- Market analysis
- Business Fluctuations
- Macroeconomics Data
- Neoclassical and Keynesian Economics Models to examine possible solutions to Business Fluctuations in the short run and the achievement of long-term goals.
- Fiscal Policy
- Monetary Policy

Most important for you, please contact me any time for further questions.

Guillermo Cruz Professor of Economics
