NEW NONCREDIT COURSE PROPOSALS DISCUSSION OF NEED – CONSENT CALENDAR

The following Noncredit Course Discussions of Need were reviewed and approved at the [October 21, 2025 Noncredit Curriculum Committee](#) meeting.

Subject & Number	Title	Rationale for New Course Proposal	Author	Effective
NC.ANTH-001	Culture and Medicine	Completing this 3-part mini course sequence will provide students a Certificate in Cultural Competency and Clinical Care. Each course will provide students with a unique lens to explore how health, illness, and healing are shaped by cultural, social, and environmental contexts. Students gain critical skills to analyze health disparities and apply anthropological insights to real-world issues in healthcare and society.	L. Malley J. Vasquez	TBD
NC.ANTH-002	Comparing Perspectives on Illness and Treatment			
NC.ANTH-003	Exploring Alternative Medicine Practices			
NC.HLTH-009	Dementia Care Training Certificate	Dementia, especially Alzheimer’s disease (AD), is one of the most pressing and fast-growing public health challenges in the United States. Currently, over 6.7 million Americans aged 65 and older live with Alzheimer’s disease—a number expected to more than double by 2060 (Alzheimer’s Association, 2024). California, in particular, faces an urgent demographic shift: by 2030, nearly one in four Californians will be over the age of 60 (California Department of Aging, 2023), significantly increasing the demand for dementia care. The majority of individuals with dementia reside in home or community-based settings, not in medical institutions. This means that non-medical caregivers, including personal care aides (PCAs), family members, and activity staff, provide the bulk of day-to-day care, often without formal training specific to dementia (PHI, 2021). As dementia progresses, caregivers must manage complex behavioral symptoms, communication barriers, and emotional challenges—areas not comprehensively covered in traditional PCA or CNA programs.	M. Pakgohar	TBD

Subject & Number	Title	Rationale for New Course Proposal	Author	Effective
NC.PLGL-003	Mock Trial	The Mock Trial course will provide students in the Paralegal Studies and Pathway to Law School programs as well as students with an interest in a legal career with a practical, performance-based learning experience that directly connects theory to courtroom practice. While existing courses emphasize legal research, writing, and substantive law, this course uniquely focuses on applied trial skills, oral advocacy, and procedural analysis through simulation and role-play.	N. Faudree L. Young	TBD
NC.PTA-040	Physiology Review for Movement Professionals	Building on anatomical foundations, the course delves into the functional dynamics of the musculoskeletal system—exploring how bones, muscles, joints, and connective tissues interact to produce movement and respond to therapeutic interventions. Students will study biomechanics, neuromuscular coordination, and physiological responses to manual therapy and exercise, gaining insight into common pathologies and recovery mechanisms.	D. Pevsner K. Almero- Fabros	TBD
NC.PTA-041	Musculoskeletal Anatomy Review for Movement Professionals	This course offers a focused and in-depth exploration of the structural components of the musculoskeletal system, designed to complement and extend the foundational content covered in general Anatomy. It emphasizes the form and organization of bones, muscles, joints, and connective tissues, directly addressing the specialized instructional needs of students in the Physical Therapist Assistant (PTA) and Occupational Therapist Assistant (OTA) programs.
