

Physics AS-T (CSU GE Track)

Program Description: The Physics program provides curriculum concerned with the properties of matter and energy, and their interactions and transformations. The Physics program includes both major and non-major courses. The following is a sample of career options available for physics. Most require a baccalaureate degree, and some require a graduate degree: air pollution operations, consumer safety officer, engineer, teacher, astrophysicist and physicist.

Program SLO: 1) Reason conceptually and logically about physical phenomena using scientific models involving the fundamental physics principles of kinematics, kinetics, energy conservation, electromagnetism, thermodynamics, optics and modern physics 2) Utilize appropriate instruments to measure and examine examples of physics phenomena and relate the results of experimental data to the concepts discussions in the lecture portion of class.

Important Transfer Information: Connect with a counselor to develop an individualized student education plan through the Counseling Department @ <https://www.canyons.edu/counseling> or (661) 362-3288/(661) 362-3811. The sequence listed below, may not meet all your transfer admissions requirements.
