 - Having a Keynote lunch speaker from NILOA
 - How did this crisis affect your data, your retention?
 - It would be interesting to look at snapshots of the assessment data
 - A broader examination of data, that includes student assessment, success, and retention.
 - Talking about data disaggregation and what that looks like.
 - It would be good to have a place to talk about what happened, how the change affected the way you assess, what did we learned from it, what are things of value that we learned.
 - A dialog where we can discuss the impact of crisis in student assessment and learning.
 - What a great time this would have been to have students ePortfolios online. Thinking of having that practice to use now and in the future. Work is being done with the Paralegal department to create the ePortfolios for their students. One powerful thing has come out of this, adopting the folio thinking.
 - We could have a Zoom workshops on folio thinking as a way of reflection, but also providing information what folio thinking culture really is like.
 - How folio thinking ties in to Metacognition to moving to broader educational world.
